

# Can I create a picture to represent waves?

Task 1—

Look at the pictures on the following slides:

- Has the artist used different colours or different shades of the same colours?
- What type of sea has been represented? Calm or rough? How has the artist shown this?

Task 2 —

Paint, Draw or Collage your own wave picture.

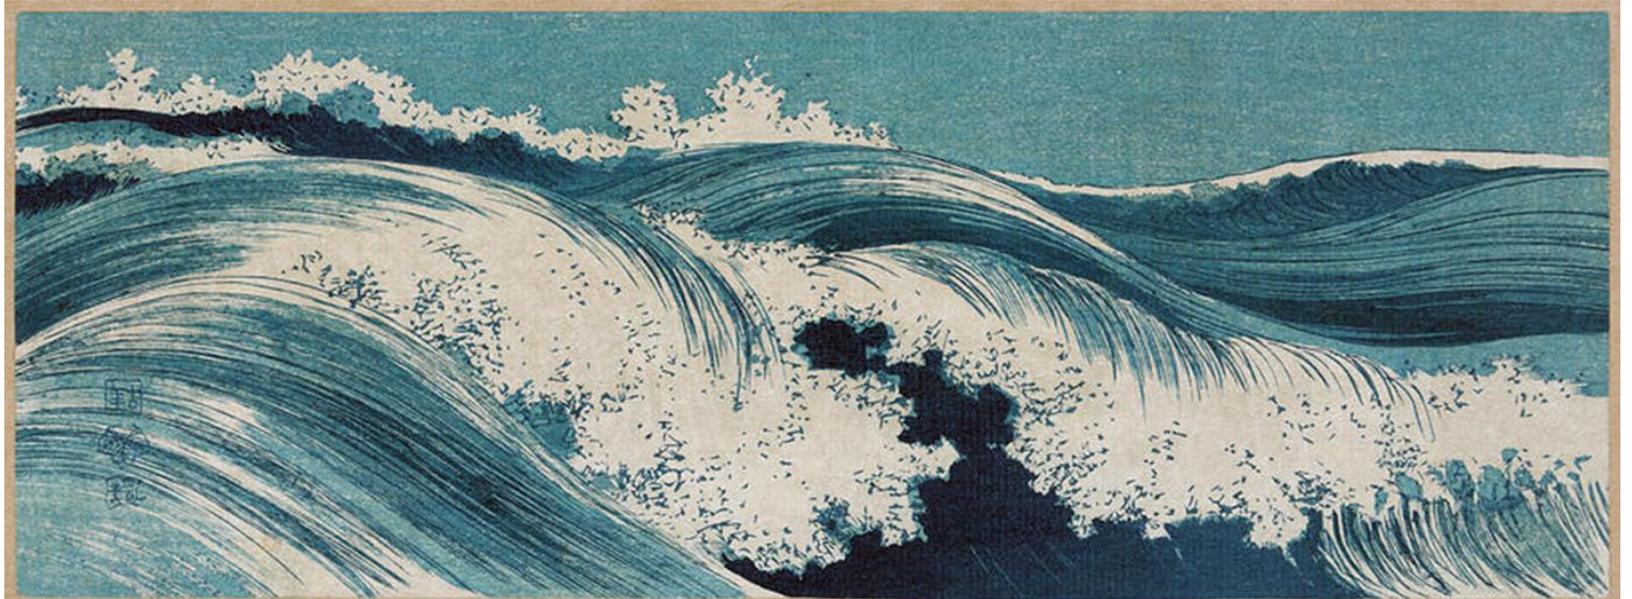

Think about

- Colour mixing to create different shades and tones.
- Marks made with paint, pencil or pen to create pattern.
- Be brave, there are no wrong answers.

(I have included a template that can be coloured if you need it)

The Great Wave off Kanagawa (also known as the great wave or simply the wave) is one of the most recognizable works of Japanese art in the world. It is a woodblock print by the Japanese artist Hokusai.
