

Whales are the largest animals on Earth and they live in every ocean. They are mammals because they are warm-blooded creatures that nurse their young. Even though whales can stay underwater for a long time, they have to come up to the surface to breath. There are many different species of whales.

Artist Robert Wyland has created some famous murals featuring images of life-size grey whales, humpback whales, blue whales and other sea life. These are known as the Whaling Walls.

Can I create an image of a whale?

Task –

Use paint, chalk, crayons, pencil or pens to create a picture of a whale.
