

Teacher notes

Children will show how various pictorial representations can be split in half by cutting the pictures in half and recording this in their books. Children should understand that a half is two equal parts and that a picture may have more than one way of being halved.

DEVELOPING

Children will use simpler pictorial representations to split in half.

SECURE

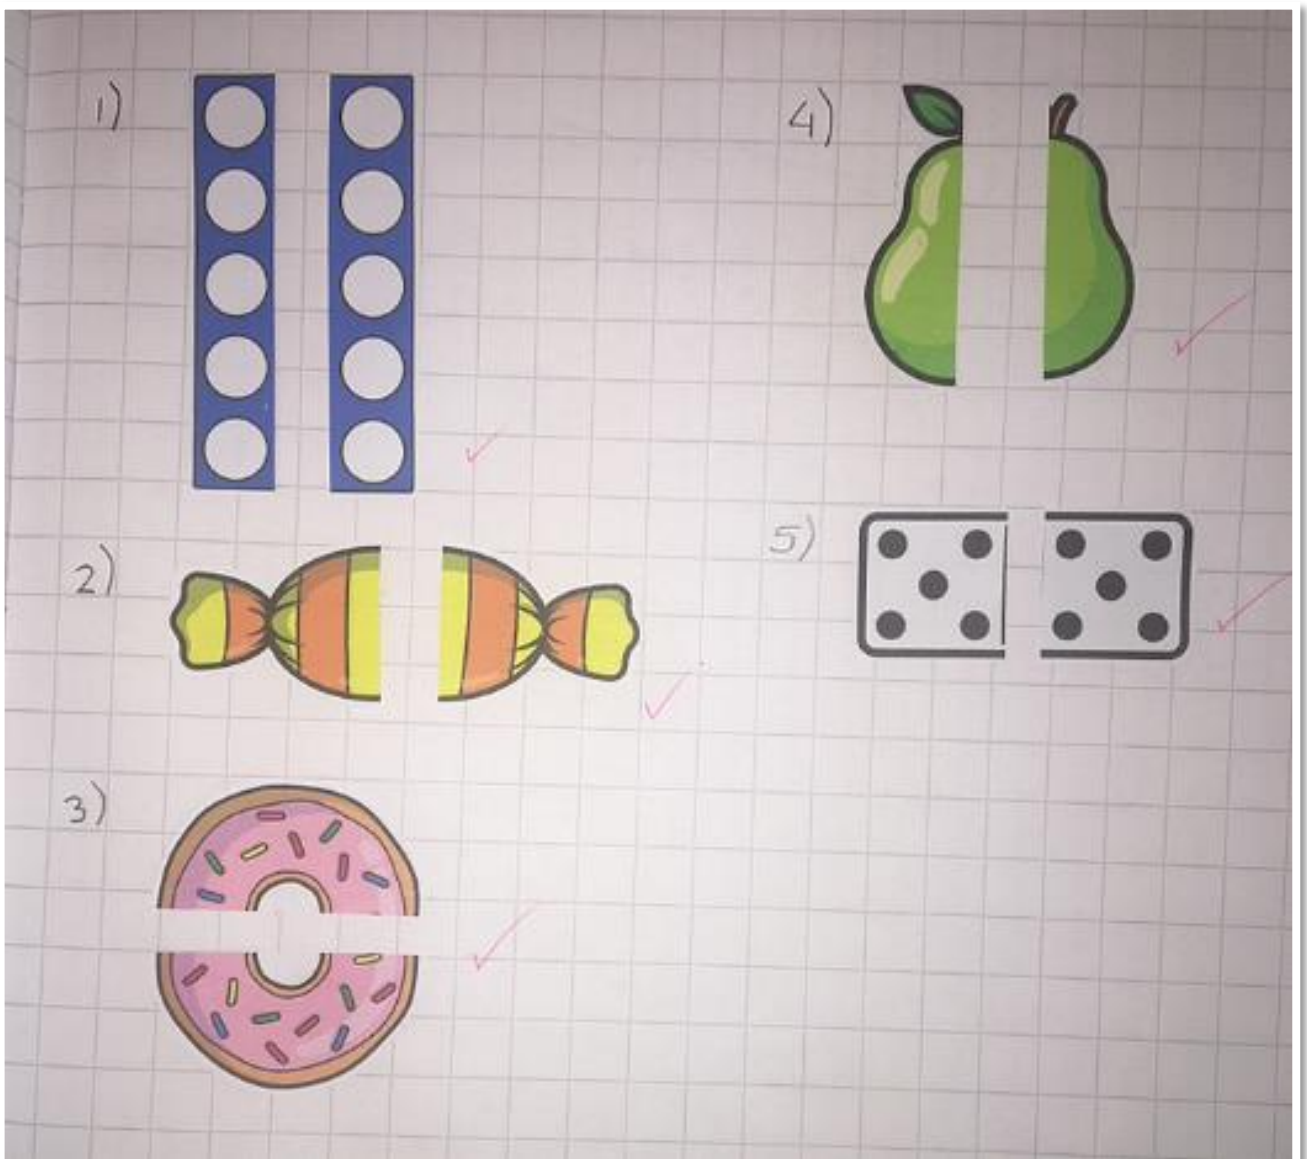

Children will split more complex pictorial representations in half that may only have one way of being halved.

MASTERY

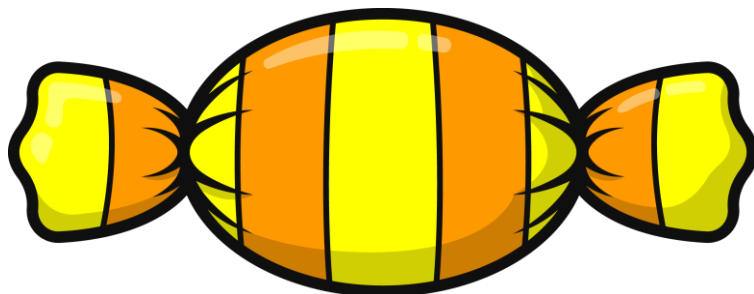

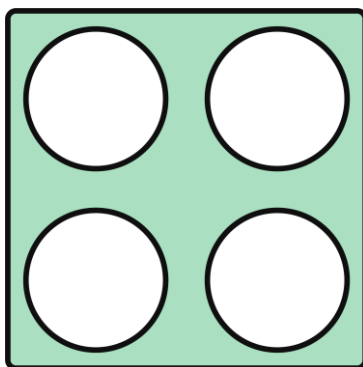

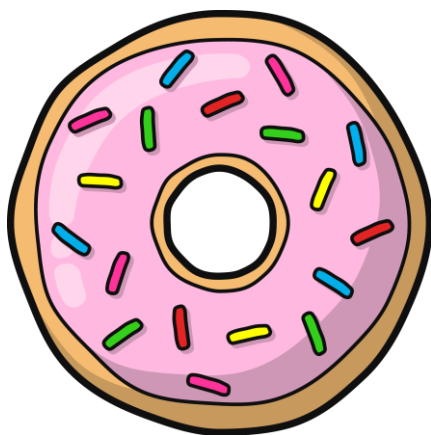

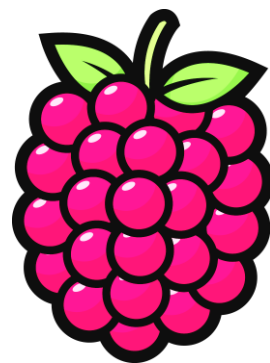

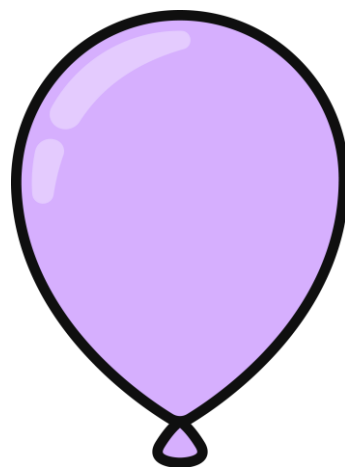

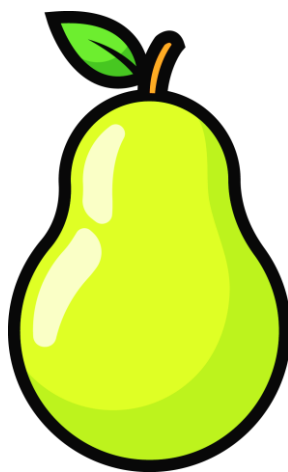

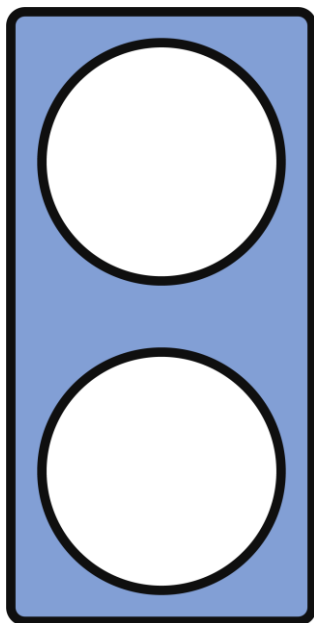

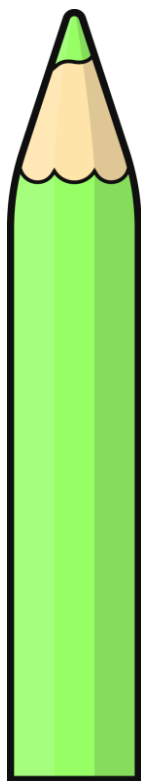

Children will split more complex pictorial representations in half that may only have one way of being halved.

Example:

Make halves

Make halves
